

Verizon Advanced Net Conference Powered by Microsoft Office Live Meeting

Features

Live PC sharing capabilities

Online whiteboards for brainstorm sessions

Single interface for audio and Web Meeting management

Benefits

Easy, reliable, and secure

Improved employee productivity

Real-time group collaboration

There is no denying the fact that technology has changed the way business operations are managed today. Companies can no longer depend on traditional communication methods to conduct their daily business efficiently. As a result, companies are now willing to expand their communication avenues and find ways to conduct business in a more timely and efficient manner, and they are taking the lead in increasing customer satisfaction, productivity, product quality, and financial performance. In fact, the use of web conferencing can be a very significant predictor of a top performing company.*

Help accelerate your project cycles and drive business growth with Verizon Advanced Net Conference powered by Microsoft® Office Live Meeting. With Verizon Advanced Net Conference, you can communicate and collaborate with customers, co-workers, and partners from around the world. This can help you:

- **Increase productivity.** Projects are completed faster with less confusion. Don't spend time making changes on documents and sending them back and forth. Verizon Advanced Net Conference lets you make changes together, online, once.
- **Reach more potential customers.** Get your message to more people and generate more leads with online webinars.
- **Travel smarter.** Travel only to those meetings that require face-to-face interaction. And while you're away, continue to work and meet with Advanced Net Conference.
- **Better manage your resources.** Avoid limiting your training to only those who can fit in the room. Net Conferencing allows you to expand your results while controlling your costs.

Benefits of Advanced Net Conference Powered by Live Meeting

- **Integration with Verizon Instant Meeting.** Now with one interface, conference leaders can control both the audio and the web portion of their meeting. Leaders may view, mute, and disconnect participants who are on their Instant Meeting number directly from the Live Meeting screen.
- **Easily launch meetings.** Advanced Net Conference powered by Live Meeting integrates with many business applications, including Microsoft Office, to make starting a meeting fast and easy. Leaders can send out invitations with links to their meetings directly from Microsoft Outlook®.
- **Flexible enough for either impromptu or scheduled meetings.** Advanced Net Conference can quickly start a meeting or, with the online scheduling tool, set the date and time for an upcoming one. Leaders can even schedule reoccurring meetings with the same meeting information and passwords.
- **Extend your reach with replays.** Leaders can record and post replays of the meeting. Participants can receive the full impact of your meeting by viewing and hearing the replay through their PC from the website.

Some of the Powerful Features That Allow You to Enjoy Easy Collaboration

- **Annotations.** Leaders and participants can highlight areas of interest with multi-colored lines and shading to make it easy to read.
- **Application Sharing.** Share and control applications remotely in real-time without uploading files to a server.
- **Broadcast Audio.** Presenters may use their audio conference meeting to discuss topics that attendees may listen to through their PC.
- **Document Sharing.** View, annotate, and enlarge documents or graphics in high resolution for all to see.

Fact Sheet

- **Event Registration.** Leaders may create a unique website to allow participants to register for an event. Leaders can also set up automatic reminders and thank you e-mails.
- **Full Screen View.** Leaders and participants may individually choose to minimize the meeting controls to allow the presentation to take up the entire screen.
- **Integrated Audio.** Manage both your web and audio participants with an integrated interface.
- **Integration with LCS.** Advanced Net Conferences can be started from the Live Communication Server (LCS) through the Microsoft Office Communicator interface.
- **Language Localization.** Each participant may see the console in their own language via their browser setting. Supported languages are English, Japanese, Traditional Chinese, Simplified Chinese, Korean, French, German and Spanish.
- **Meeting Lobby.** The leader may direct attendees to a holding area or "Meeting Lobby" before allowing them to join the meeting.
- **Net Q&A.** Participants can type questions to the leader, and the leader can choose to respond to the questioner privately or publicly. Presenters may save the Net Q&A to their PCs.
- **Polling.** Gather important information by conducting online polls in real-time. Attendees may be directed to select one or more than one answer.
- **Self-Serve Replay**.** Leaders may start and stop a replay on their own and post it to their customized site.
- **128-bit SSL Encryption.** Hold even your most confidential meetings with complete confidence.
