

Get innovative web tools to MEET AND COLLABORATE INSTANTLY.

Verizon Instant Net Conference with Cisco WebEx Meeting Center

Move a conversation to an interactive online meeting at a moment's notice for better collaboration.

Get more done, quicker than ever before. With Verizon voice and collaboration solutions, your employees can accelerate response times, make critical business decisions at a moment's notice, and easily work together to accomplish more.

Technology is constantly improving the way businesses communicate. Today, you interact with more co-workers and customers in more places on a wider variety of devices. Effective remote collaboration is key, but without the right tools, you risk interrupting business operations and delaying or losing potential sales.

Instant Net Conference with Cisco WebEx Meeting Center lets you hold spontaneous meetings for quick and easy collaboration. Simply start a web meeting using a desktop computer, mobile phone, or tablet, and you can instantly share files, develop content, plan, or add additional parties. Perfect for informal meetings, the solution also provides rich interactive tools to create notes and share documents, video, and presentations.

PERSONAL ON-DEMAND MEETINGS

With Verizon Instant Net Conference services you can create impromptu web conferences within seconds. A reusable meeting number allows you to quickly arrange a conference without being online, so starting a meeting and collaborating is easy and convenient.

SCALE WITH THE CLOUD

Our conferencing services are delivered as Software-as-a-Service (SaaS) through the Cisco WebEx Cloud, and are easy to roll out across your organization. The Cisco WebEx Cloud is a global, enterprise network designed specifically for highly secure delivery of on-demand applications. It offers a scalable architecture, consistent availability, multilayer tenant security and is subject to rigorous independent audits, including SSAE-16 and ISO 27001.

Verizon Instant Net Conference with Cisco WebEx Meeting Center can help you:

- Increase productivity by making changes to documents together online
- Reach more potential customers around the globe—all you need is Internet access
- Reserve your travel budget for meetings that require face-to-face interaction
- Manage resources more effectively, improving results while controlling costs

TOOLS FOR INTERACTIVE COLLABORATION

Annotations. Select areas of interest with multi-colored lines and easy-to-read highlighting.

Application sharing. Share and control applications remotely in real time without uploading files to a server.

Desktop sharing and remote control. Share and collaborate on content with remote attendees, passing control so they can share their desktops or annotate yours.

Leader floating PowerPanels. View the attendee list, chat, and video activity.

In-session alerts. Get audio and visual alerts, so you're aware of new attendees or chat messages, even when these panels are minimized.

Real-time polling. Gather important information during a meeting by conducting online polls. Attendees may be directed to select one or more answers.

Microsoft® PowerPoint® speaker notes. View notes discretely from the meeting console.

Rich multimedia experience. Engage your audience by incorporating PowerPoint, Adobe Flash animations, and audio and video files into your presentations.

Video. Give up to six attendees a real-time visual reference through your web camera.

Cross-platform support. Gain access through Microsoft Windows®, Apple Mac, Linux, and Oracle Solaris—as well as mobile devices.

Communicate and collaborate more effectively with customers, employees, and partners from around the world.

- Share documents, presentations and applications
- Access anytime, virtually anywhere
- Protect your network with robust security
- Conduct meetings with geographically dispersed staff
- Create real-time action items and notes online

A QUICK MEETING SOLUTION

Instant Net Conference with Cisco WebEx Meeting Center helps you quickly start interactive, impromptu meetings. The solution brings teleconferencing, chat, e-mail, and file sharing together to help you effectively enhance interdepartmental teamwork, deliver real-time communication, and get people together from the office or mobile devices.
